

# Adding a License to a Thinknx Server

- **Step 1** Copy the license code received upon your purchase.

Step 1: License code

- **Step 2** Log in to your server by inputting ip\_address:5051 into your web browser.

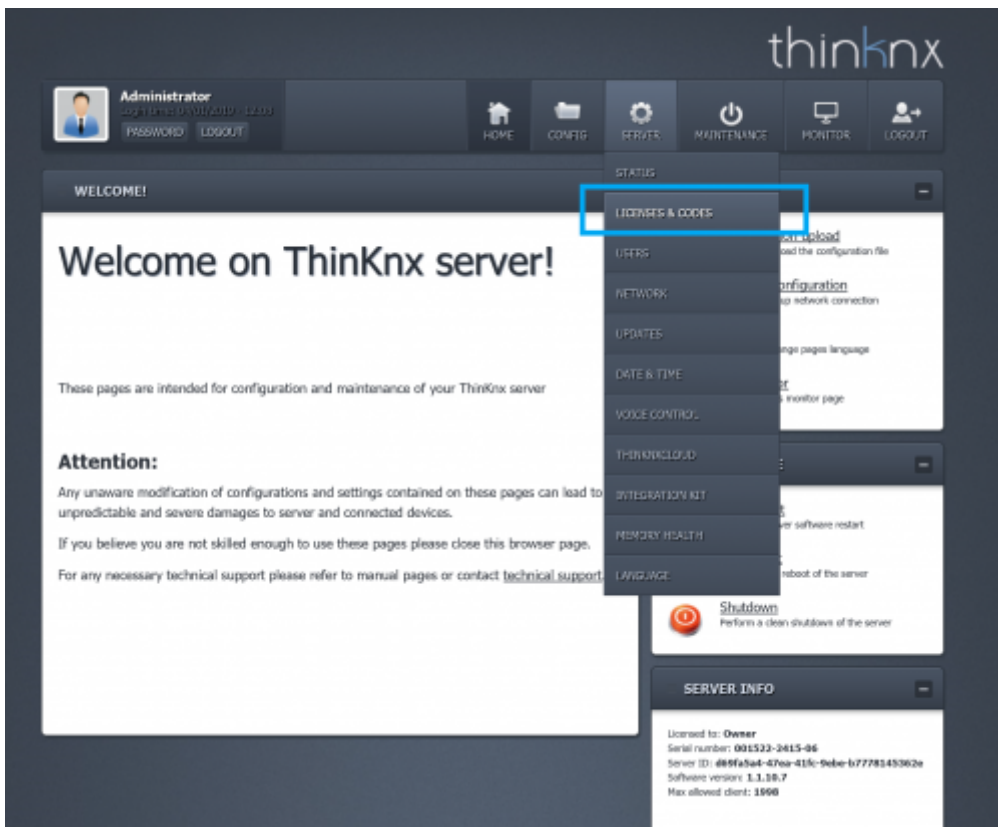

Step 2: Server Webpage

- **Step 3** Enter your login credentials (default username: service, default password: password).

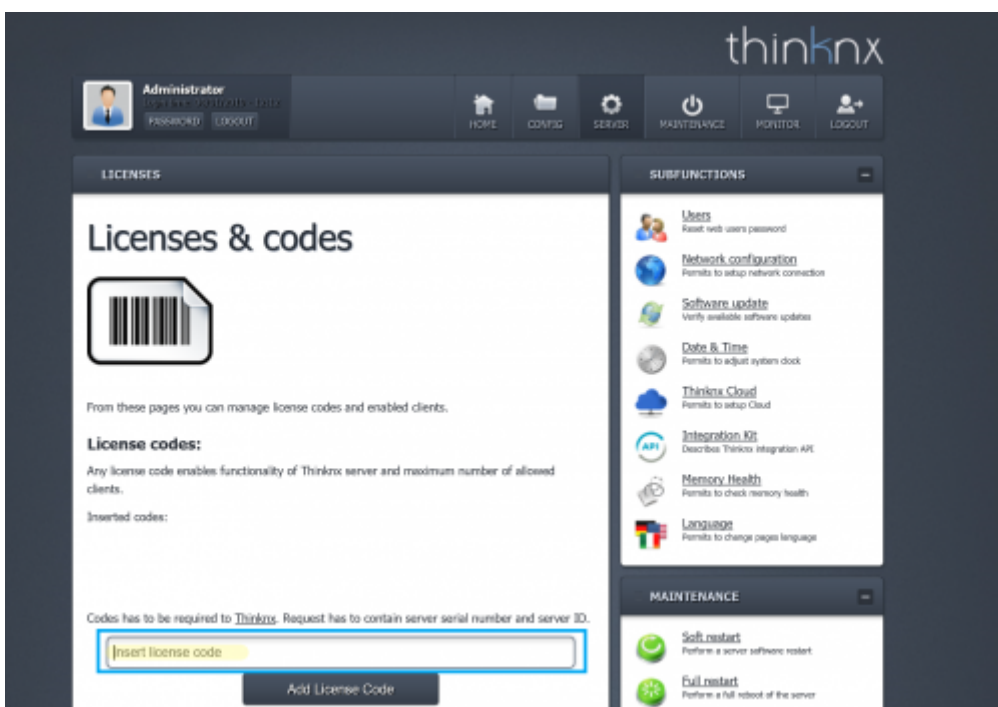

Step 3: Server Login

- **Step 4** Go to Server -> Licenses and Codes.

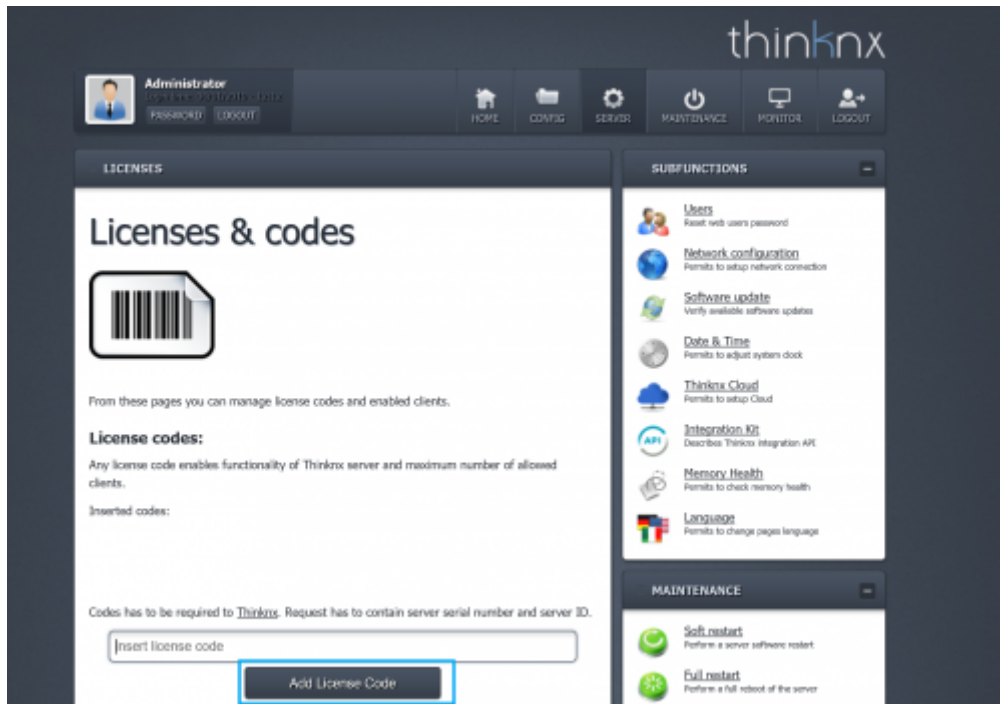

Step 4: Licenses and Codes

- **Step 5** Paste the copied license in the text field under “Licenses”.

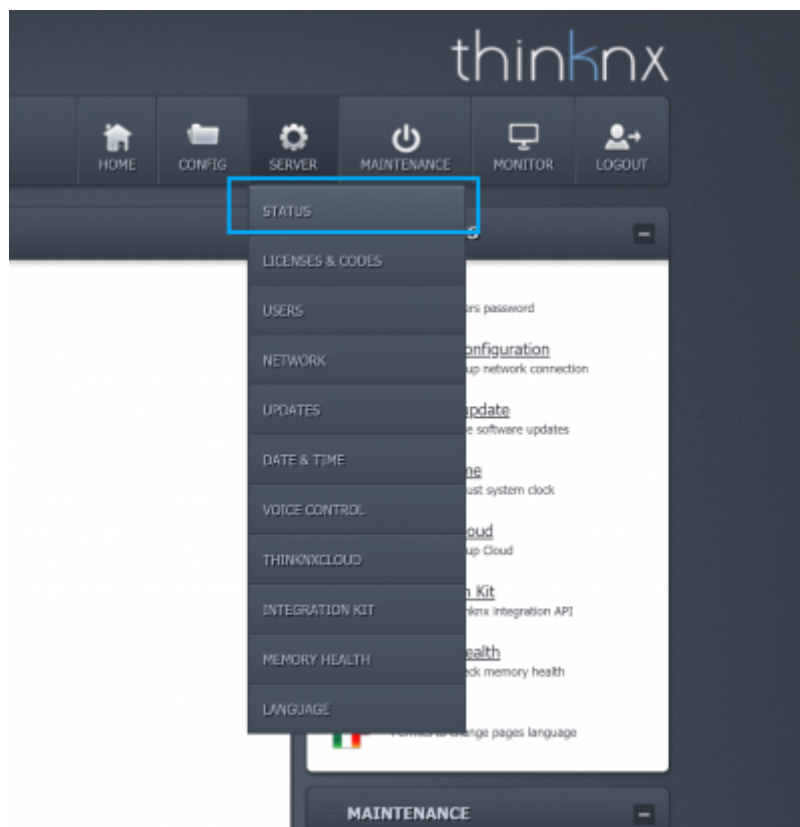

Step 5: Pasting the Code

- **Step 6** Click on Add License button.

Step 6: Adding the Code

- **Step 7** To make sure the license is activated, go to Server -> Status.

Step 7: Status Page

- **Step 8** Check under “Enabled Licenses” if your newly added license is now activated.

- Enabled licenses:
  - KNX**
  - Security appliances**
  - Intercom**
  - Modbus Gateway**
  - Reports & Charts Engine**
