Motion detector with luminosity sensor for ceiling mounting

### **ZPDEZTPV2**

# **FEATURES**

- Motion detection through PIR technology
- Available in the following colors: gloss white (RAL 9003) and anthracite black (RAL 9004)
- Detection range of up to Ø 6 m
- Lighting level sensor with human eye spectral sensitivity
- 6 motion detector channels
- 2 constant light control channels
- Occupancy detection
- 10 logic functions
- Total data saving on KNX bus failure
- Integrated KNX BCU (TP1-256)
- External dimensions: Ø 58 x 41 mm
- Internal dimensions: Ø 48.3 x 41 mm
- Cutting diameter (hole saw blade): Ø 51 mm
- False-ceiling flush-mounted
- Conformity with the CE, UKCA, RCM directives (marks on the back side)

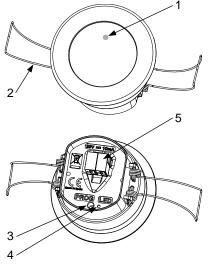

Figure 1: EyeZen TP v2

| 1. Detection LED indicator | 2. Retaining spring | 3. Programming button |  |
|----------------------------|---------------------|-----------------------|--|
| 4. Programming LED         |                     | 5. KNX connector      |  |
|                            |                     |                       |  |

Programming button: short press to set programming mode. If this button is held while plugging the device into the KNX bus, it enters the safe mode.

Programming LED: programming mode indicator (red). When the device enters the safe mode, it blinks (red) every half second. During the start-up (reset or after KNX bus failure) and if the device is not in safe mode, it emits a red flash.

| GENERAL                       | SPECIFICATIO    | ONS                 |   |  |  |
|-------------------------------|-----------------|---------------------|---|--|--|
| CONCEPT                       |                 |                     | DESCRIPTION   |  |  |
| Type of device                |                 |                     | Electric operation control device   |  |  |

| Degree of protection          |                 |                     | IP20, clean environment   |  |  |
| Installation                  |                 |                     | Flush-mounted in false ceiling or surface-mounted (accesory part ZACEZENSF is required)   |  |  |
| Minimum clearances            |                 |                     | Not required  |  |  |
| Response on KNX bus failure   |                 |                     | Data saving according to parameterization   |  |  |
| Response on KNX bus restart   |                 | t                   | Data recovery according to parameterization   |  |  |
| Operation indicator           |                 |                     | The programming LED indicates programming mode (red).<br>The motion sensor initialization, after powering up the device, is indicated<br>through the detection LED (red blinking).<br>The motion detections are indicated by a red flash (in case the LED is<br>enabled). |  |  |
| Weight                        |                 |                     | 36 g  |  |  |
| Housing mate                  | erial           |                     | PC/ABS FR V0 halogen free housing and HDPE lens.  |  |  |

<sup>1</sup> Maximum consumption in the worst-case scenario (KNX Fan-In model).

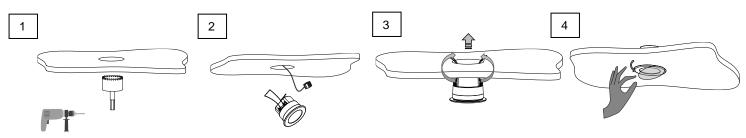

<sup>2</sup> Temperatures over 35 °C could decrease the detection range

# **TECHNICAL DOCUMENTATION**

EyeZen TP v2

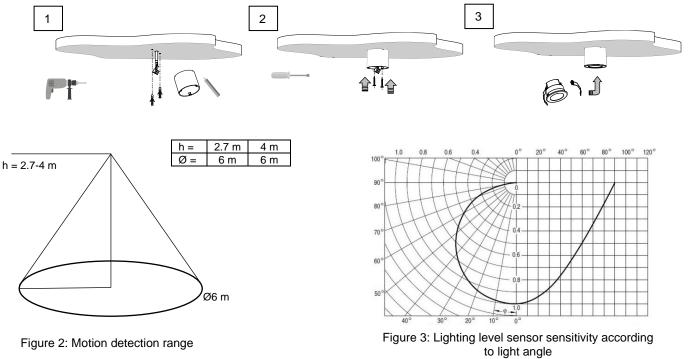

# FLUSH-MOUNTED INSTALLATION INSTRUCTIONS

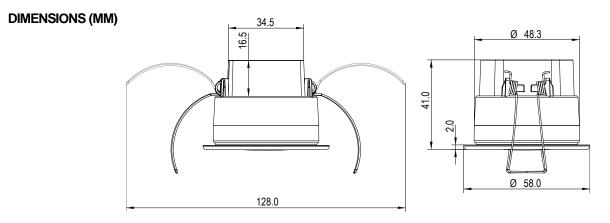

- 1. Drill a Ø 51 mm hole in the ceiling.
- 2. Recover the wiring and connect it to the device.
- 3. Insert the device into the ceiling hole and allow the retaining springs to close.
- 4. Fix it, paying attention that it is correctly levelled and oriented, and remove the protective plastic film from the lens.

# SURFACE-MOUNTED INSTALLATION INSTRUCTIONS

In case of surface-mounted installation, please, refer to the ZACEZENSF datasheet.

# SAFETY INSTRUCTIONS AND ADDITIONAL NOTES

- Installation should only be performed by qualified professionals according to the laws and regulations applicable in each country.
- Do not connect the mains voltage nor any other external voltage to any point of the KNX bus; it would represent a risk for the entire KNX system. The facility must have enough insulation between the mains (or auxiliary) voltage and the KNX bus or the wires of other accessories, in case of being installed.
- Keep the device away from water (condensation over the device included) and do not cover it with clothes, paper or any other material while in use.
- The WEEE logo means that this device contains electronic parts and it must be properly disposed of by following the instructions at https://www.zennio.com/en/legal/weee-regulation.
- This device contains software subject to specific licences. For details, please refer to https://zennio.com/licenses.
